Join us for an exciting conference on financing and investing in green steel production!

As the world continues to grapple with the impacts of climate change, industries are increasingly looking for ways to reduce their carbon footprints. Green steel production offers a promising solution to this challenge, with the potential to revolutionize the steel industry and support a more sustainable future.

18 & 19 October 2023 · Stockholm · Sweden

## Powering sustainability together!

After the enormous success of the inaugural Green Steel World Expo & Conference in Essen, Germany, we are coming back with the GSW Finance Summit in Stockholm, Sweden on 18 & 19 October 2023.

Modern human life as we know it would be deemed unimaginable without steel. The metal plays a vital role in more aspects of our lives than we are possibly aware of. So, the bottom line is that we can't stop using steel. But the good news is that there are numerous ways to produce green steel, but the transition requires huge investments.

As we have already established, "Green Steel" is the future, but effective decarbonisation of the industry will only be possible if financial institutions identify and target the right solutions.

This event will bring together stakeholders to discuss the steps towards creating a sustainable finance network for the entire steel supply chain.

## What is sustainable finance?

Simply put, sustainable finance refers to the process of taking environmental, social and governance (ESG) considerations into account when making investment decisions in the financial sector, leading to more long-term investments in sustainable economic activities and projects.

It is estimated that an investment of \$125T will be required to reach net zero by 2050. To fund this transition, major banks, asset managers and institutional investors committed to aligning their lending and investment portfolios to the Paris Agreement climate goals at the Glasgow Financial Alliance for Net Zero launched at the COP26 climate conference in 2021.

As finance moves to the forefront of the fight against climate change, global institutions need to gain more knowledge of the businesses they invest in.

Sustainable finance can play a critical role in decarbonising the steel industry by directing capital towards low-carbon technologies, promoting sustainable practices throughout the industry, and increasing transparency and accountability around environmental performance.

## Conference objectives

While the key objective of this event is to share knowledge, it also aims to inspire, connect, and drive meaningful change.

It also offers a unique opportunity for all the stakeholders to gain more insight into sustainable finance topics and solutions, and to get support for the challenges they face.

The conference also aims to shed light on the impact of central banks' investment on global warming and the impact of climate change on corporate governance practices.

We invite decision-makers from the private sector, finance, policymaking, and experts from various fields to join discussions about sustainability in practice for business and finance.

Sweden is one of the front-runners in the race to decarbonise steel production by demonstrating a strong commitment to sustainability, enhancing transparency, implementing innovative policies, and setting ambitious targets.

The first country in the world to pass an environmental protection act in 1967, Sweden also hosted the first UN conference on the global environment in 1972. Since then, Sweden has not looked back, managing to grow its economy substantially while reducing carbon emissions and limiting pollution.

By focusing on carbon emissions reduction, waste management, urban planning, and public transportation, Sweden's capital Stockholm has become a model for sustainable development and a hub of sustainability.

## General Info

The Green Steel World Finance Summit 2023 will be held on 18 & 19 October 2023 in Stockholm, Sweden.

### Dates and opening hours

18 October from 09.00 - 19.00  
19 October from 09.30 - 14.00

### Networking Reception

18 October from 17.00 - 19.00

### Conference timings

18 October from 09.50 - 17.00  
19 October from 09.30 - 14.00

### Location

Radisson Blu Waterfront Hotel & Stockholm Waterfront Congress Centre  
Nils Ericsons Plan 4 | 101 32 Stockholm, Sweden  
Phone: +46 8 5050 6000L
